A page of plant observations

Record what you notice in a plant photo, a book illustration or a familiar labeled plant.

This page does not identify a plant or establish that it is safe to eat or use. Looking is enough; do not taste or handle an unknown plant.

1. Date and subject

Write the date and the plant name shown on the label or source. Use "unknown" if unsure.

2. Where I looked

Book, webpage, photo or familiar labeled plant. Add a page number or link.

3. What I can see

Describe leaf shape, color and growth habit. Separate visible details from guesses.

4. A small sketch

Draw one detail, or describe it in words.

5. What the source says

Record one detail and where you found it.

6. My next question

What would you like to read about next?

Keep this page with your own notes. No account, upload or AI request is needed.
